

# Care Instructions

## 3Dee

### Cover materials

#### 3Dee with fabric cover, step/step melange (Trevira CS)

- Optimum care is ensured by using just water and pH neutral soapsuds. Stains containing oil and fat should be treated beforehand with ethyl alcohol.
- Rinse with clear water after each cleaning treatment. Never use chlorinated detergents.
- Only dampen the seat and never make it completely wet, otherwise the cushioning under the fabric might be damaged. Therefore use only very small amounts of water and detergent.
- Avoid marks by cleaning from the edge of the seat to the middle.

**Warning:** Never use chlorinated detergents.

#### 3Dee with microfibre cover

- Always dab off stains immediately using plain kitchen paper, for example, before they seep into the fabric.
- Use lukewarm water and pH neutral soapsuds for optimum stain removal.
- Stains containing oil and fat should be treated beforehand with ethyl alcohol applied with a lint-free sponge or cloth.
- Only dampen the seat and never make it completely wet, otherwise the cushioning under the fabric might be damaged.
- Rinse with clear water after each cleaning treatment.
- Avoid marks by cleaning from the edge of the seat to the middle.

**Warning:** Benzine, acetone and the like might dissolve the foam material under the cover. Never use chlorinated detergents.

#### 3Dee with PREMIUM leather cover

- Wipe with a soft, damp cloth without detergent, and then rub down with a dry, clean cloth.
- Treat subsequently with leather care products as required.

### Cleaning of the aluminium components (base, seat pan, backrest)

**Black aluminium components:** If dusty or slightly soiled, clean with a mild soap solution or glass cleaner.

**Polished aluminium components:** Clean only with a dry microfibre cloth.

Marks left by the soles of shoes on the base are best removed using a soft India rubber.
